PROFILE SUMMARY

Experienced software developer with a strong background in Angular, Node.js, HTML, CSS, JavaScript, MySQL, MongoDB, Express.js, Kubernetes, and Redis, along with ongoing learning in React and Go. Skilled in collaborating with cross-functional teams to deliver high-quality, dynamic web applications.

AREA OF EXPERTISE

HTML CSS	Angular Node.js	Kubernets GO	JavaScript MySQL	MongoDB React

PROJECTS

- Talent Acquisition Portal - I worked on the Talent Acquisition Portal, supporting over 100,000 candidates and 1,000 recruiters. I developed key features, including a referral module that allowed candidates to refer friends for over 100,000 jobs via a dedicated portal or email. I utilized Angular and JavaScript to implement features for managing requisitions, candidate profiles, onboarding, and post-requisition activities. Additionally, I enhanced recruiter capabilities for scheduling and interacting with candidates. I used HTML and CSS to create a responsive and user-friendly interface throughout the platform.

- PeopleFirst HR Platform Version 2.0 - Developed and implemented the Onboarding module for a high-traffic HR platform, enabling over 100,000 candidates to complete their onboarding process smoothly by tracking pending and completed tasks using Angular 16. Designed and built the "My Profile - Nominations" feature, including UI/UX design, API integration, and logical functionality, allowing candidates to manage various nominees for benefits like gratuity and provident funds.

- PeopleFirst HR Platform - Developed and implemented a travel module for the PeopleFirst HR platform, enhancing user experience with intuitive UI/UX design using HTML, CSS, and JavaScript. Designed and integrated features that allow users to efficiently navigate and select options using Enter and Tab keys, ensuring seamless functionality. Leveraged Angular to create and optimize UI components for various journey types, improving overall usability and accessibility.

PROFESSIONAL EXPERIENCE

Software Developer - Jio Platforms Ltd   **Sept 2022 - Present**

- Front-End Development: Utilized HTML, CSS, and JavaScript to design and implement responsive, user-friendly interfaces, ensuring a seamless user experience across devices.

- Framework Expertise: Developed dynamic web applications using Angular, enhancing functionality with modular, maintainable code.

- Back-End Development: Engineered scalable server-side solutions with Node.js and managed databases with MySQL and MongoDB for efficient data handling.

EDUCATION

Bachelor of Technology - Information Technology   **July 2017 - Sept 2021**

Chhattisgarh Swami Vivekanand Technical University.

- Relevant coursework in Information Technology
